PRODUCT CATALOGUE 2022

Simply the Best of the Best

AQUACOUSTIC HYBRID

The unique engineered tri-layer limestone polymer core provides greater dimensional stability compared to mono-layer alternatives or natural timber and the hardness of the core significantly improves the indent resistance of the surface.

The composition of the limestone core means that the cutting/sanding dust provided contains less than the GHS threshold (GHS hazard categories represent the known hazards of the chemical) of 0.1% by weight, which is required by Safe Work Australia. This means the product is not of concern with regards to respirable crystalline silica.

A photograph of an interior room with grey brick walls and a polished wooden floor. On the left, there is a doorway leading to a garden area with a brick wall and plants. In the center, another doorway leads to a brightly lit area. On the right wall, there is a window with white blinds. The text 'the flooring guys' is overlaid in the center of the image.
